

Comparing Lund diagrams Hadronic, Partonic and Shower in JEWEL

Korinna Zapp and Raghav Kunnawalkam Elayavalli
August 14th, 2019

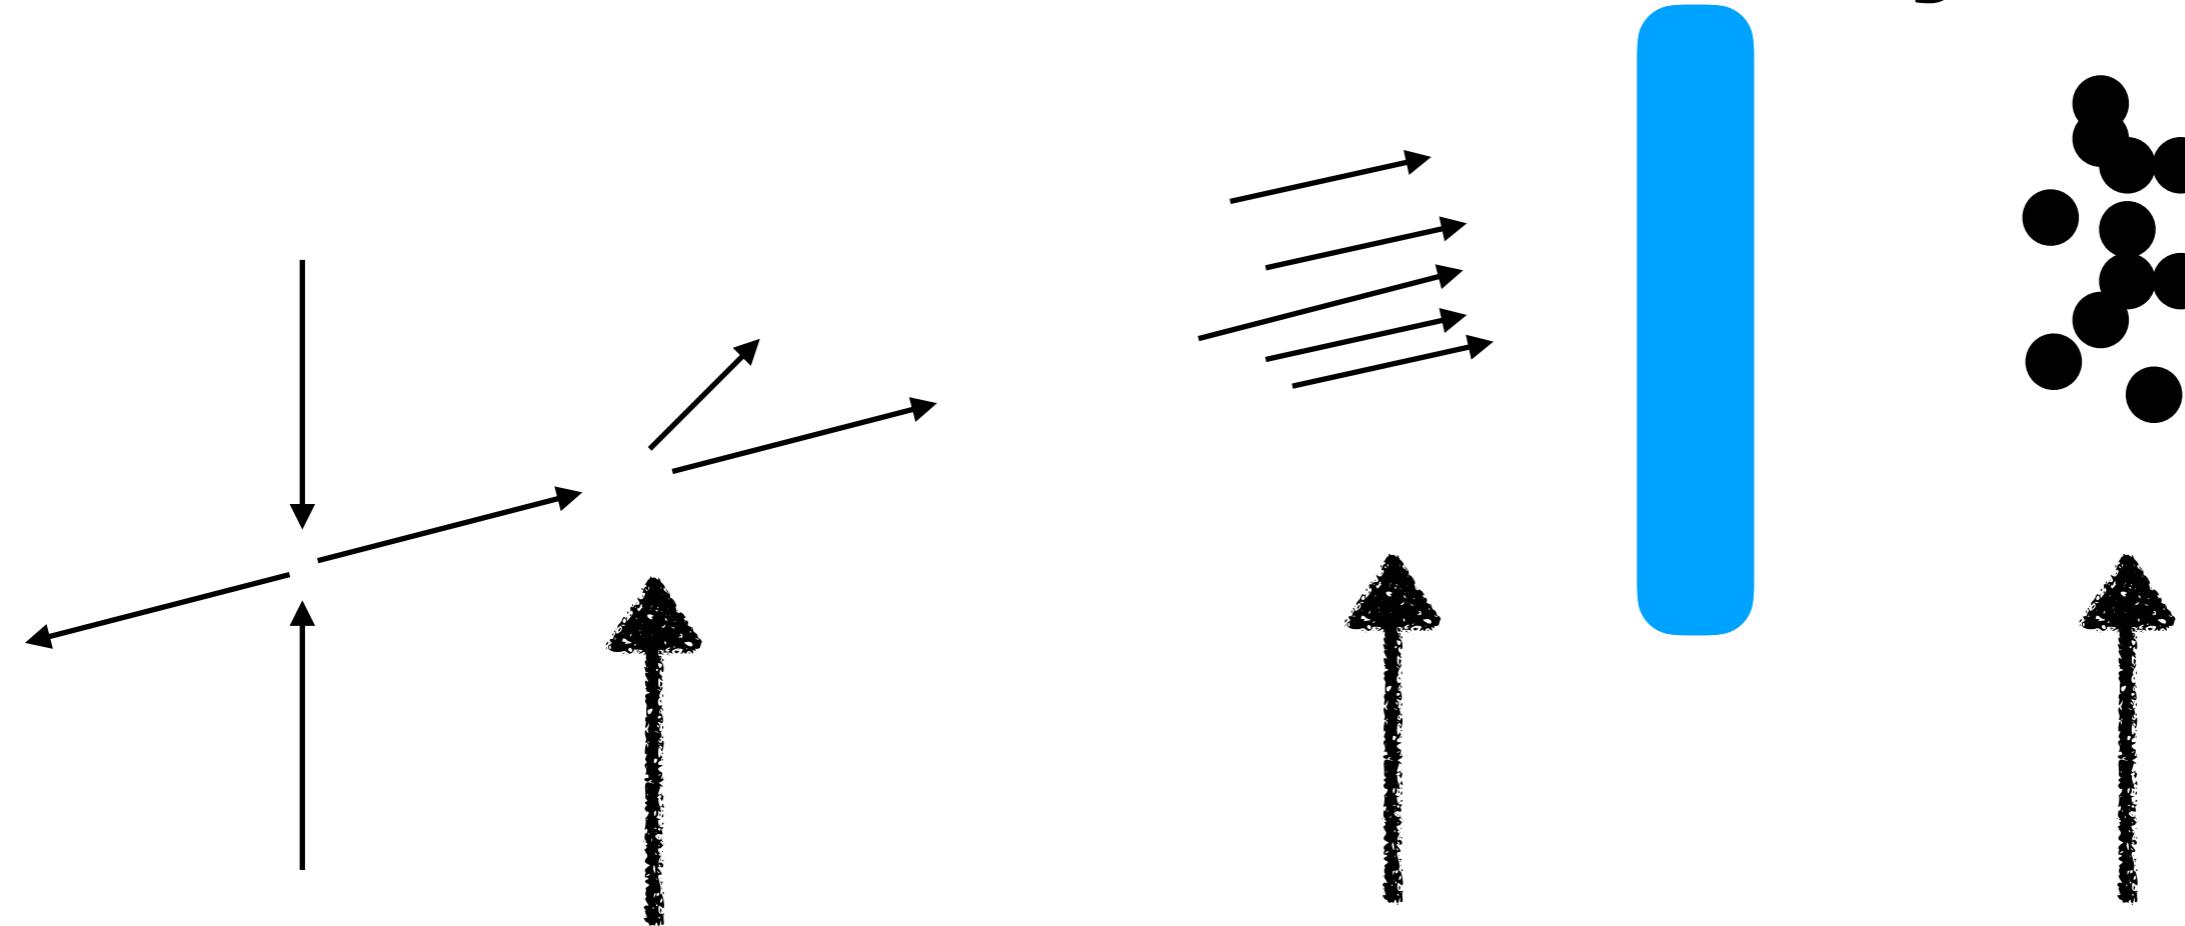

EMMI RRTF @ GSI

*Lets go “Lunni!”
- Gunther Roland*

Lets define what we are plotting

- 5 TeV collisions w/ JEWEL+PYTHIA (essentially PYTHIA-6) w/
virtuality ordered parton shower
- Primary jet clustering algorithm - anti-kT, **R=0.8 Jets with pT > 70 GeV**
- **X-axis : $\ln(1/\Delta R)$**
Y-axis : $\ln(k_T(\text{GeV}))$
- Three levels of Lund diagrams -
 - **Hadrons, Partons** - start from anti-kT clustered jets (wide radius R=0.8) and re-cluster with C/A, kT, anti-kT
 - **Parton Shower** - Start from the true MC shower search and extract 1 -> 2 splittings from HepMC file
note: jewel w/ recoils, 2 -> 2 scatterings with thermal particles *NOT* included

Kinds of Lund diagrams we will look at today -

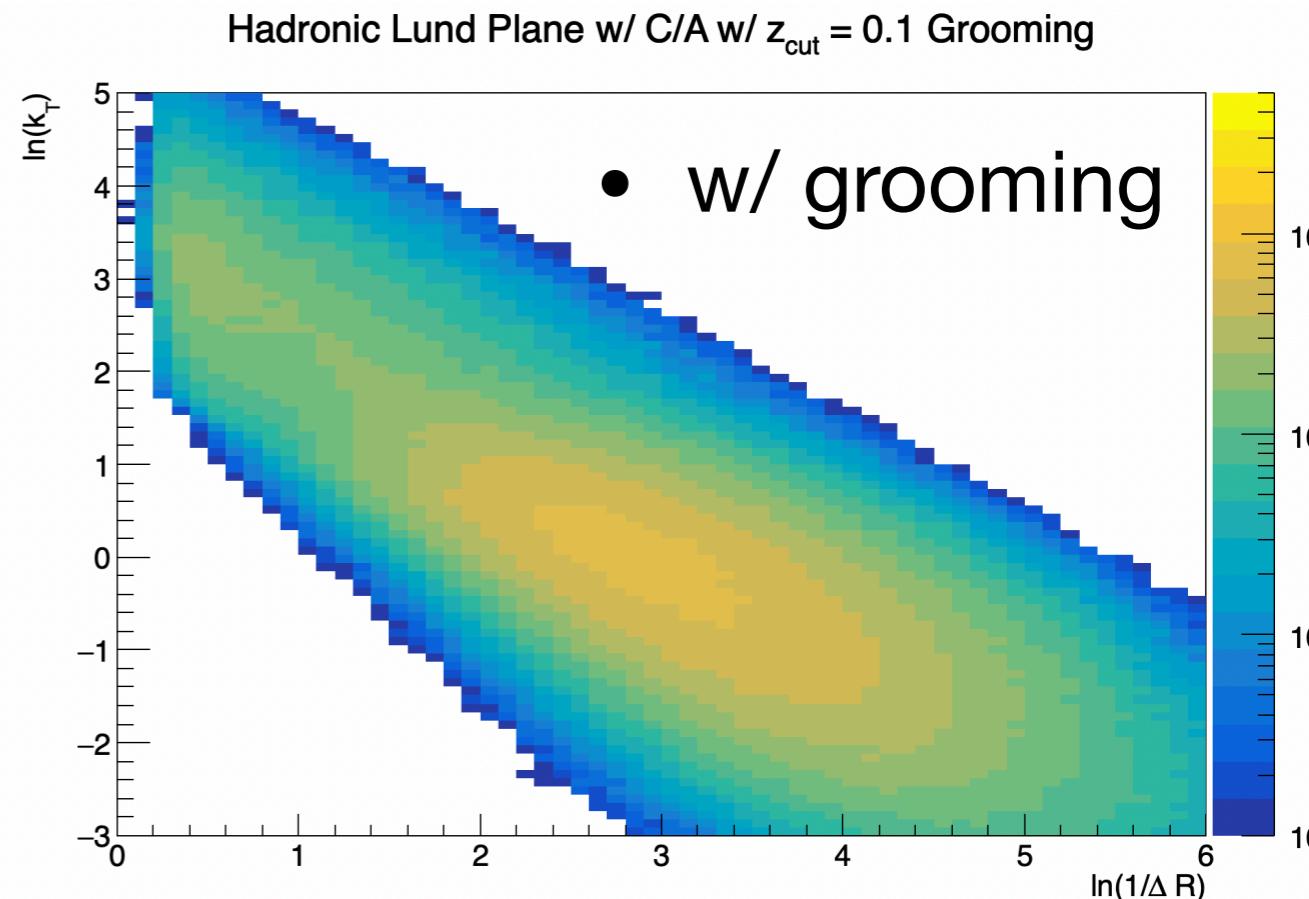

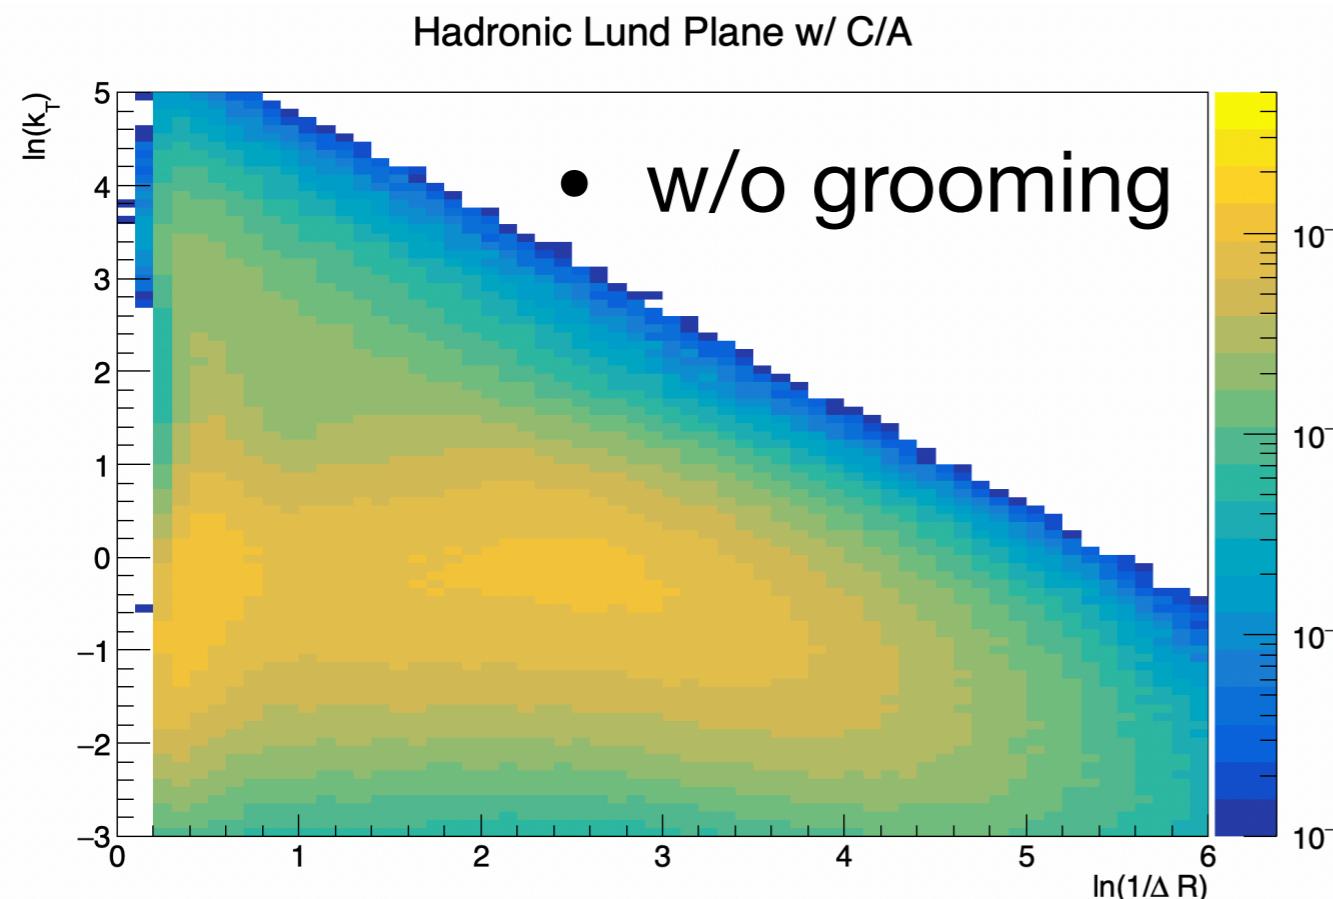

- Parton Shower
1->2
Splittings

- Partons before hadronization :
Jet clustering +
reclustering +
follow harder
prongs

- Final state hadrons :
Jet clustering +
reclustering +
follow harder
prongs

pp Collisions

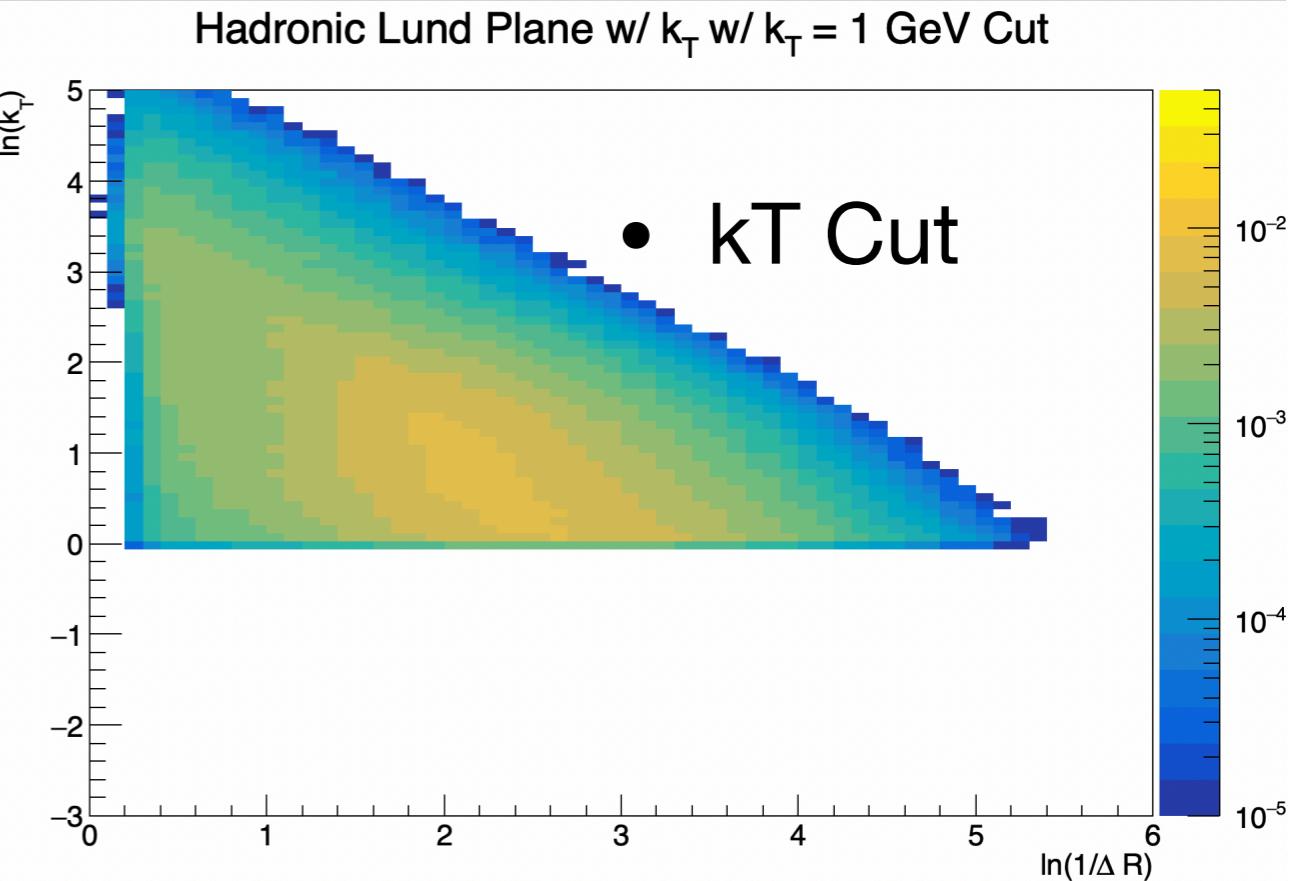

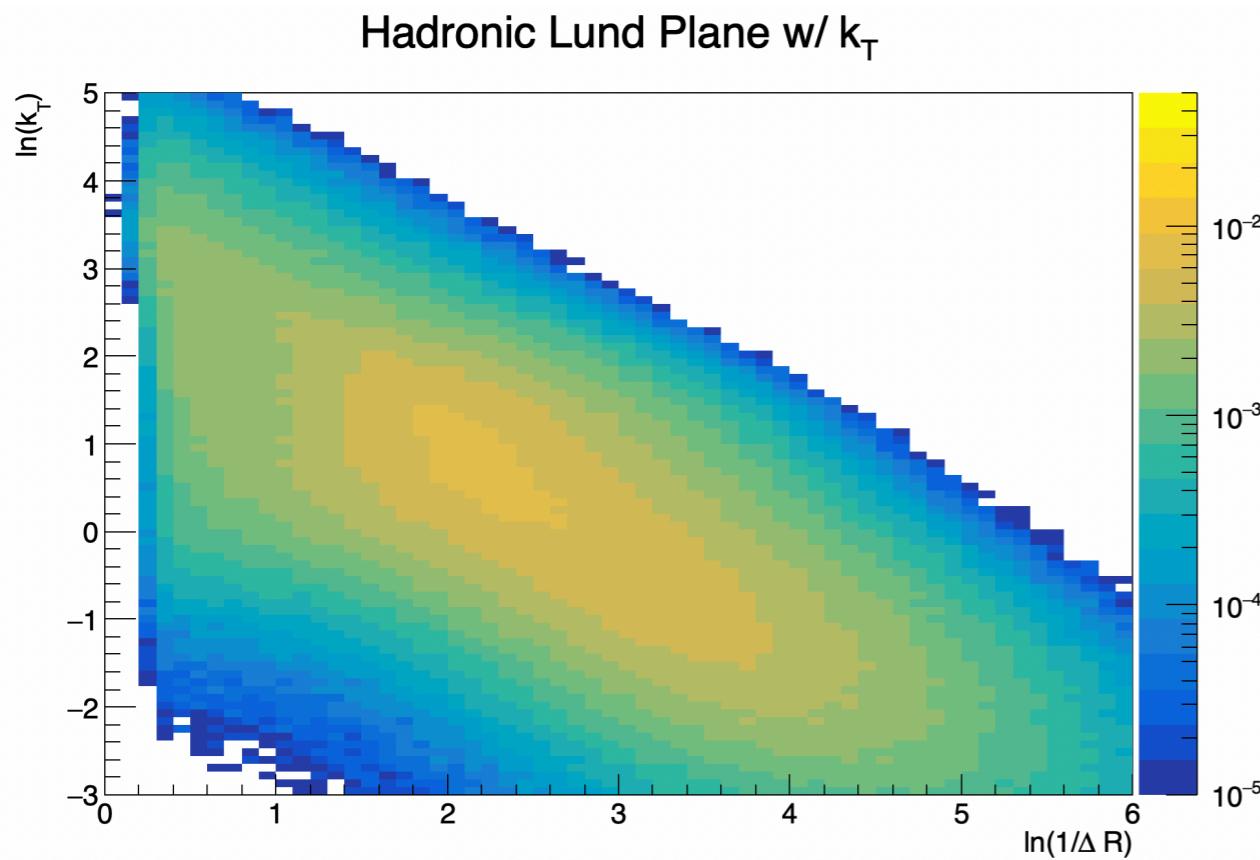

Hadronic Lund Planes w/ C/A

JEWEL+PYTHIA
pp 5 TeV
Jet pT > 70 GeV
anti- k_T R=0.8 Jets

pp Collisions

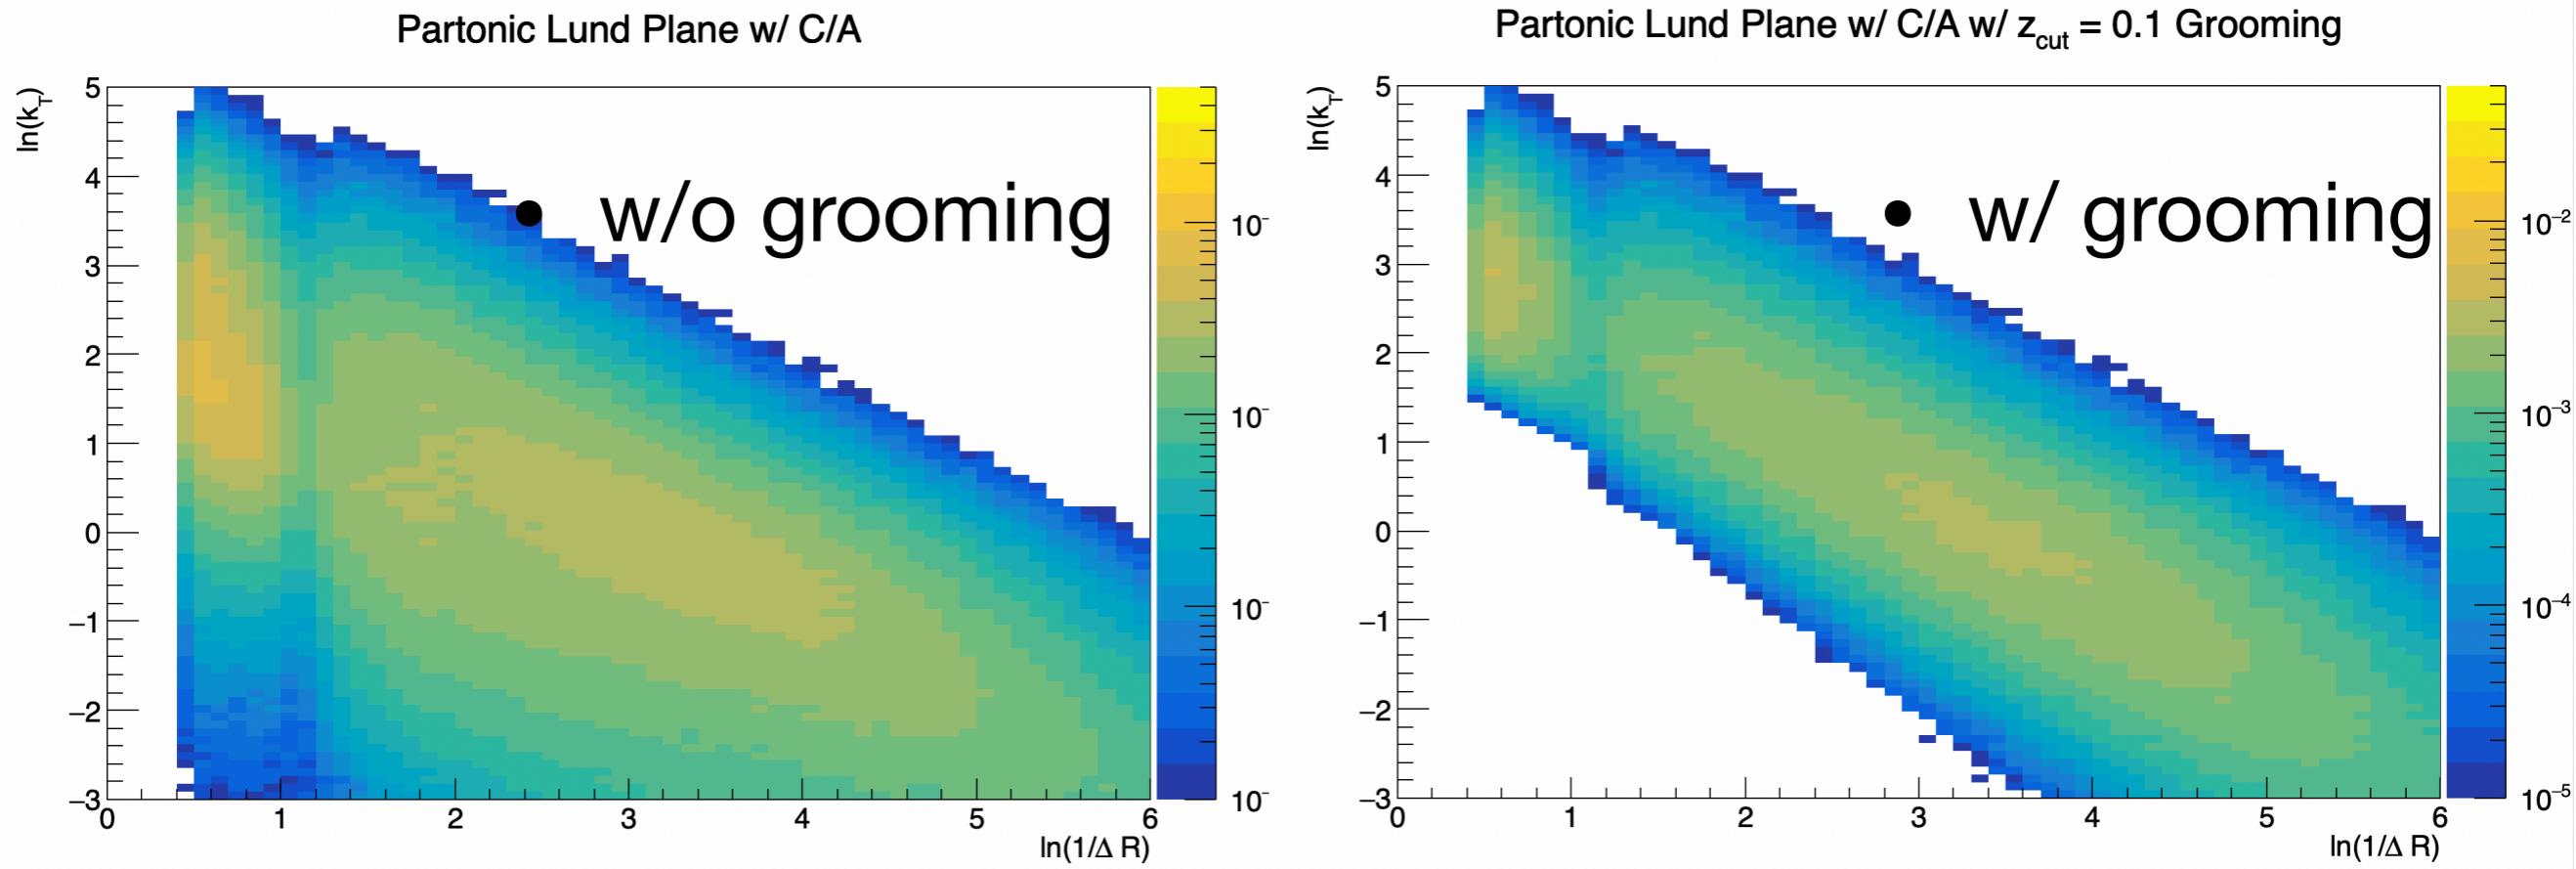

Hadronic Lund Planes w/ k_T

JEWEL+PYTHIA
pp 5 TeV
Jet pT > 70 GeV
anti- k_T R=0.8 Jets

pp collisions

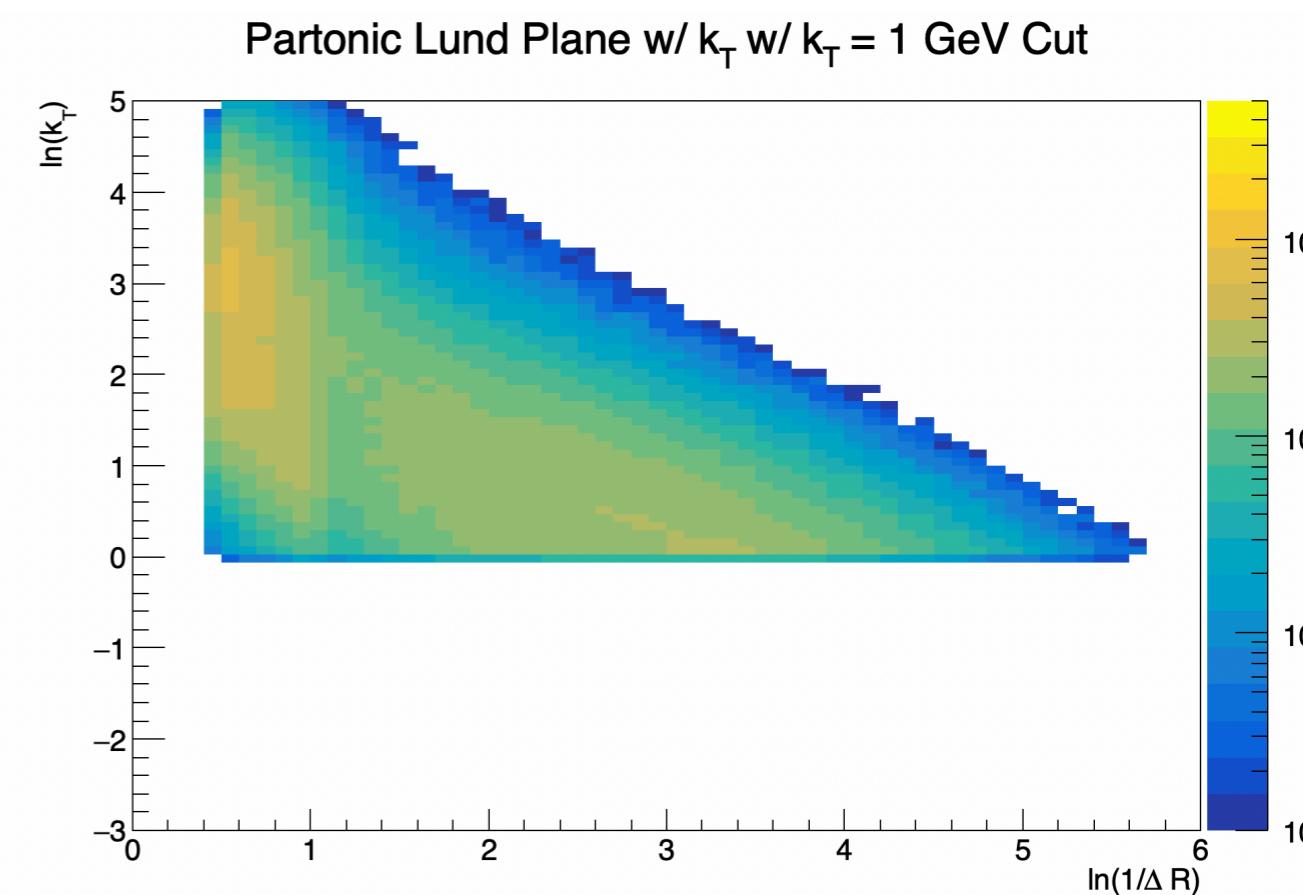

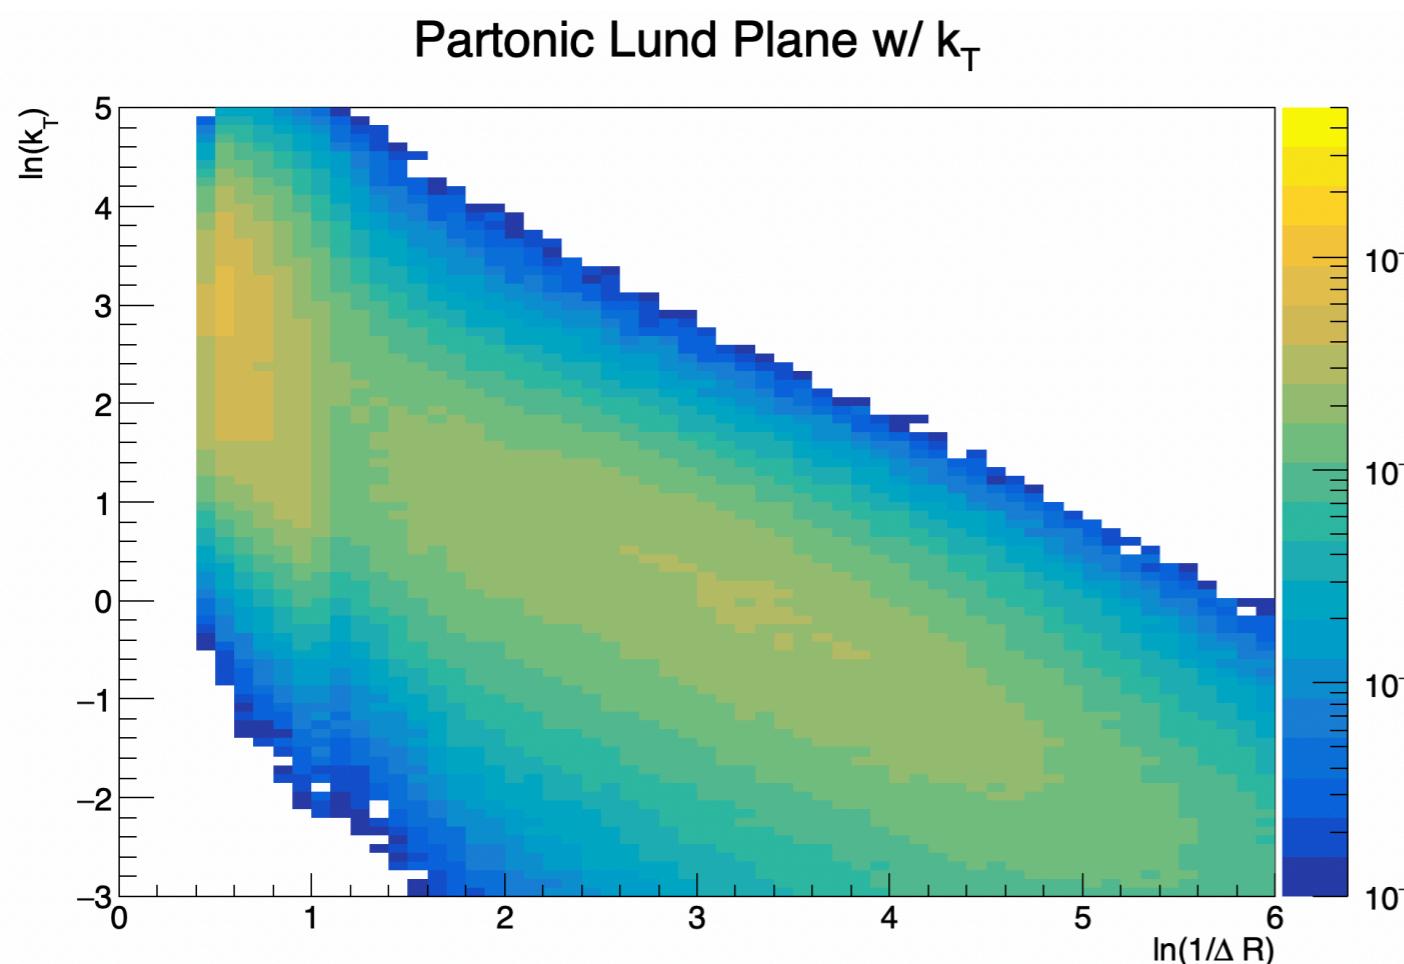

Partonic Lund Plane w/ C/A

JEWEL+PYTHIA
pp 5 TeV
Jet pT > 70 GeV
anti-kT R=0.8 Jets

pp collisions

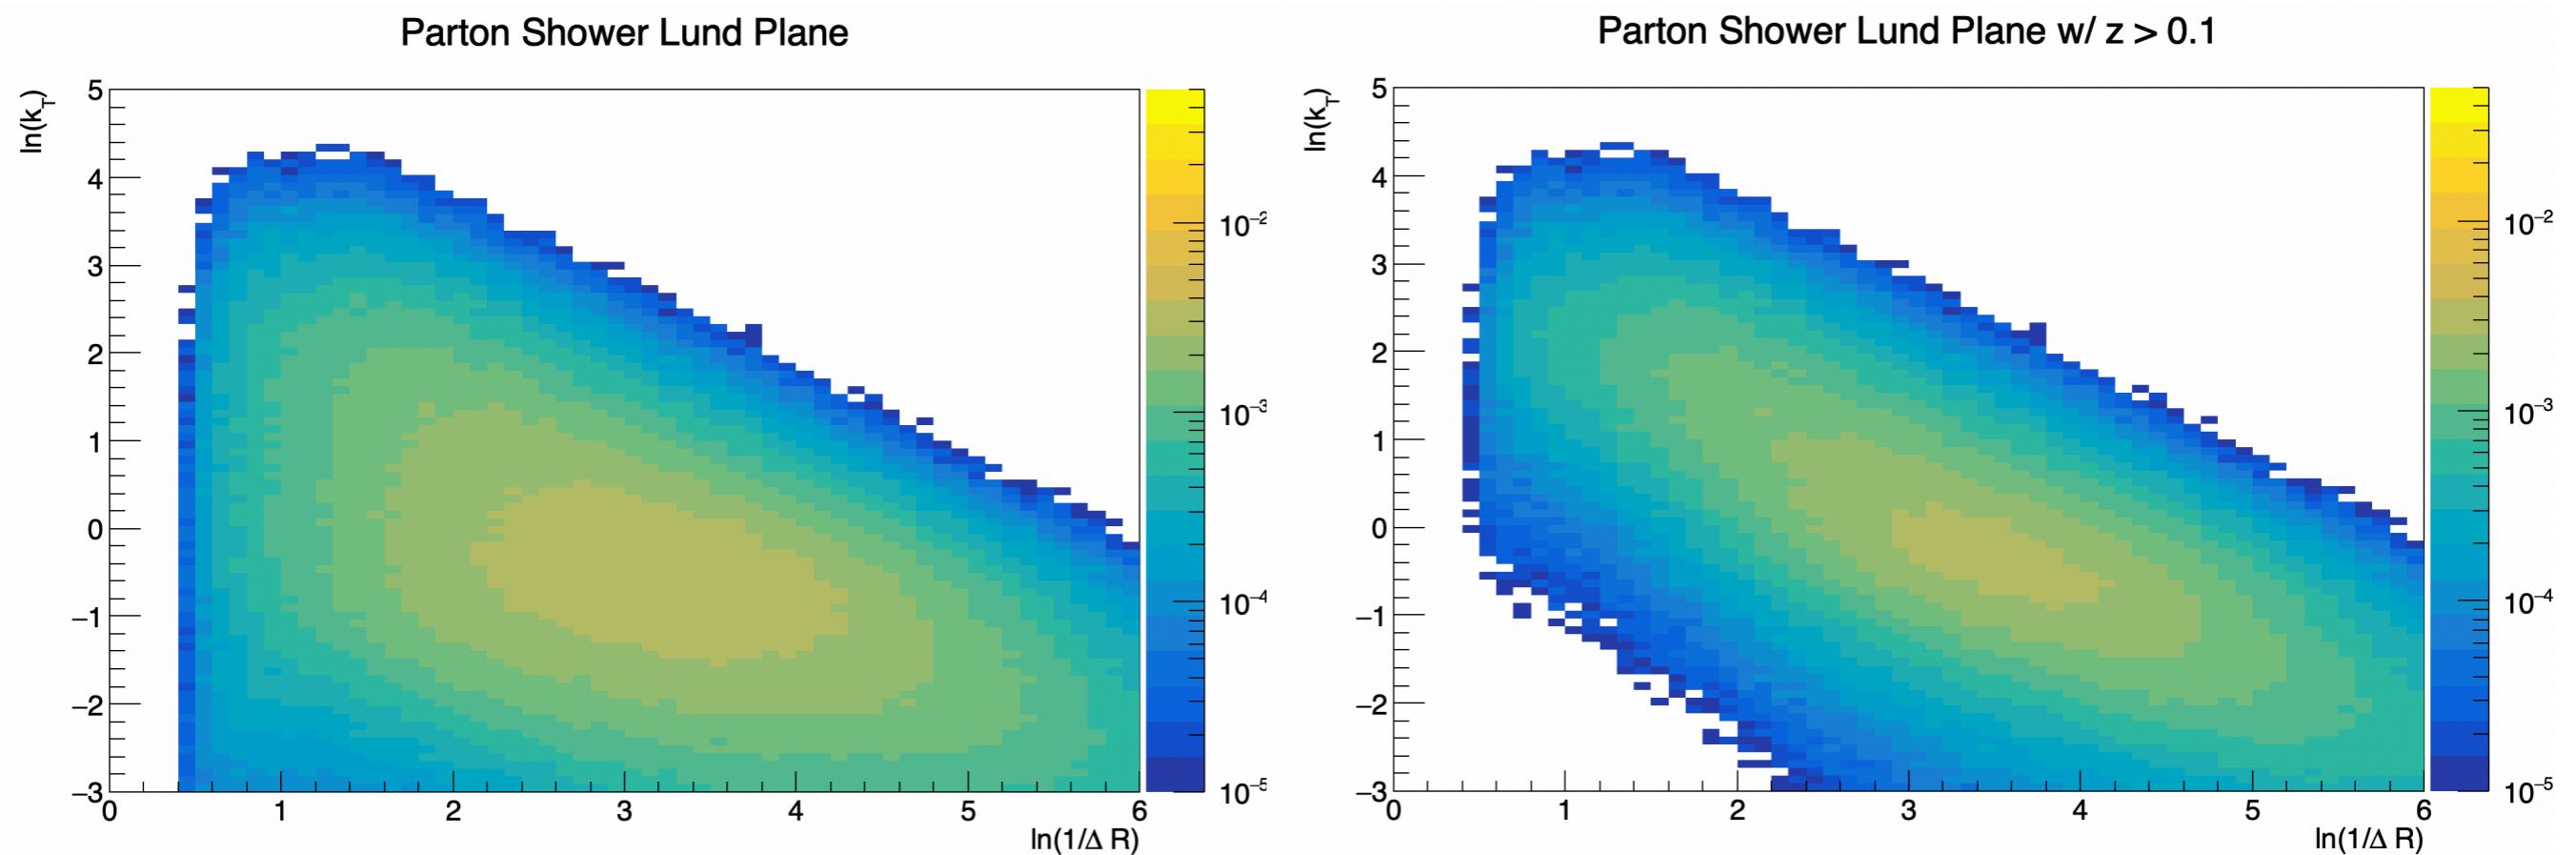

Partonic Lund Plane w/ k_T

JEWEL+PYTHIA
pp 5 TeV
Jet pT > 70 GeV
anti- k_T R=0.8 Jets

pp collisions

Parton Shower Lund Plane

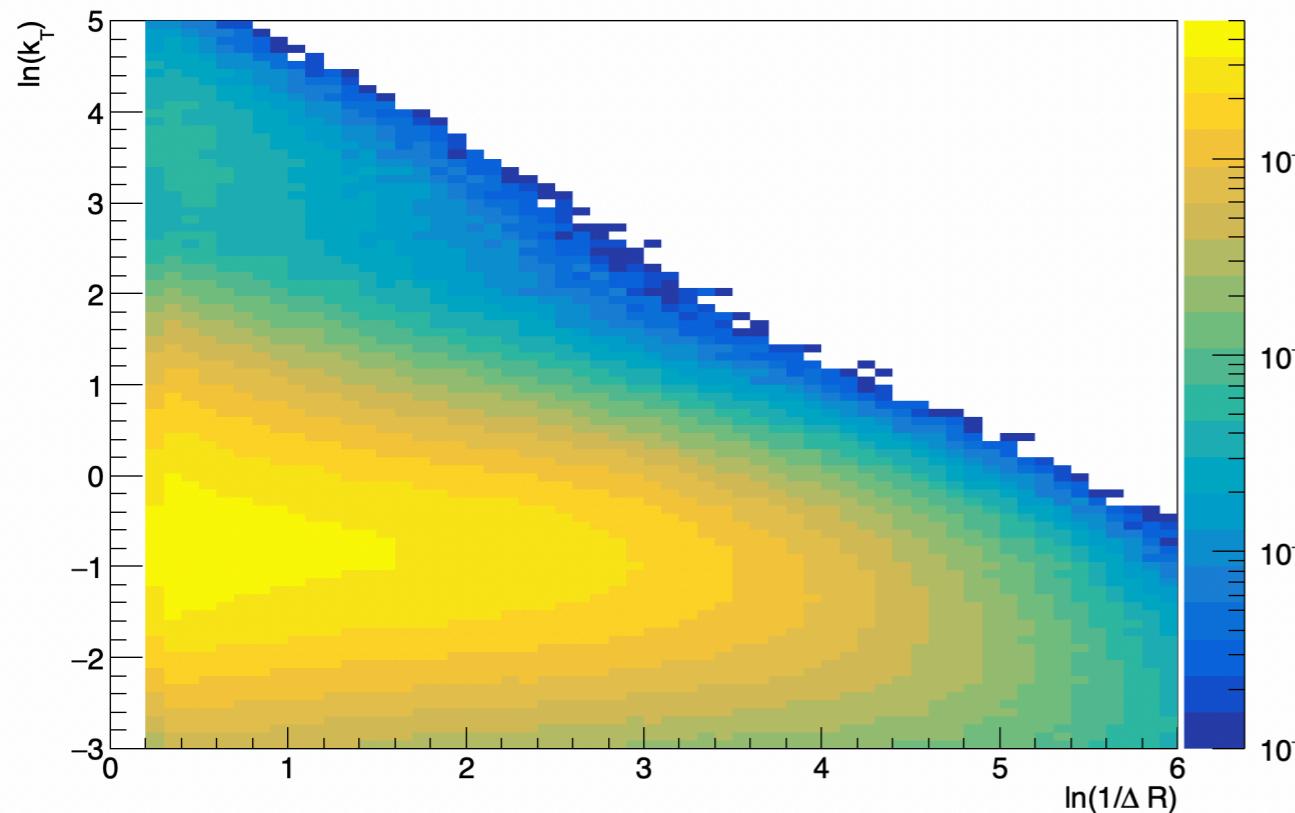

JEWEL+PYTHIA
pp 5 TeV
Jet pT > 70 GeV
anti-kT R=0.8 Jets

Backup

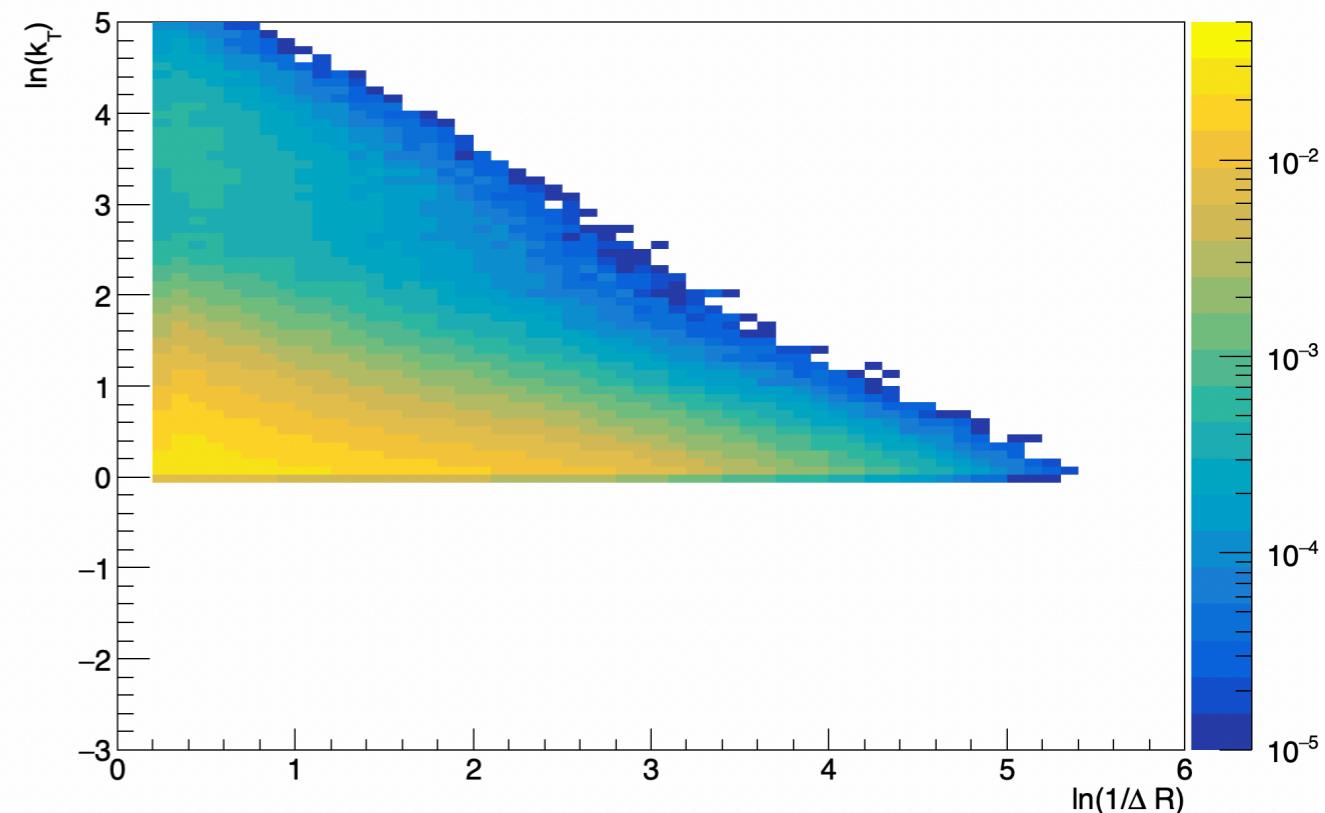

pp Collisions

Hadronic Lund Planes w/ akT

Hadronic Lund Plane w/ anti- k_T

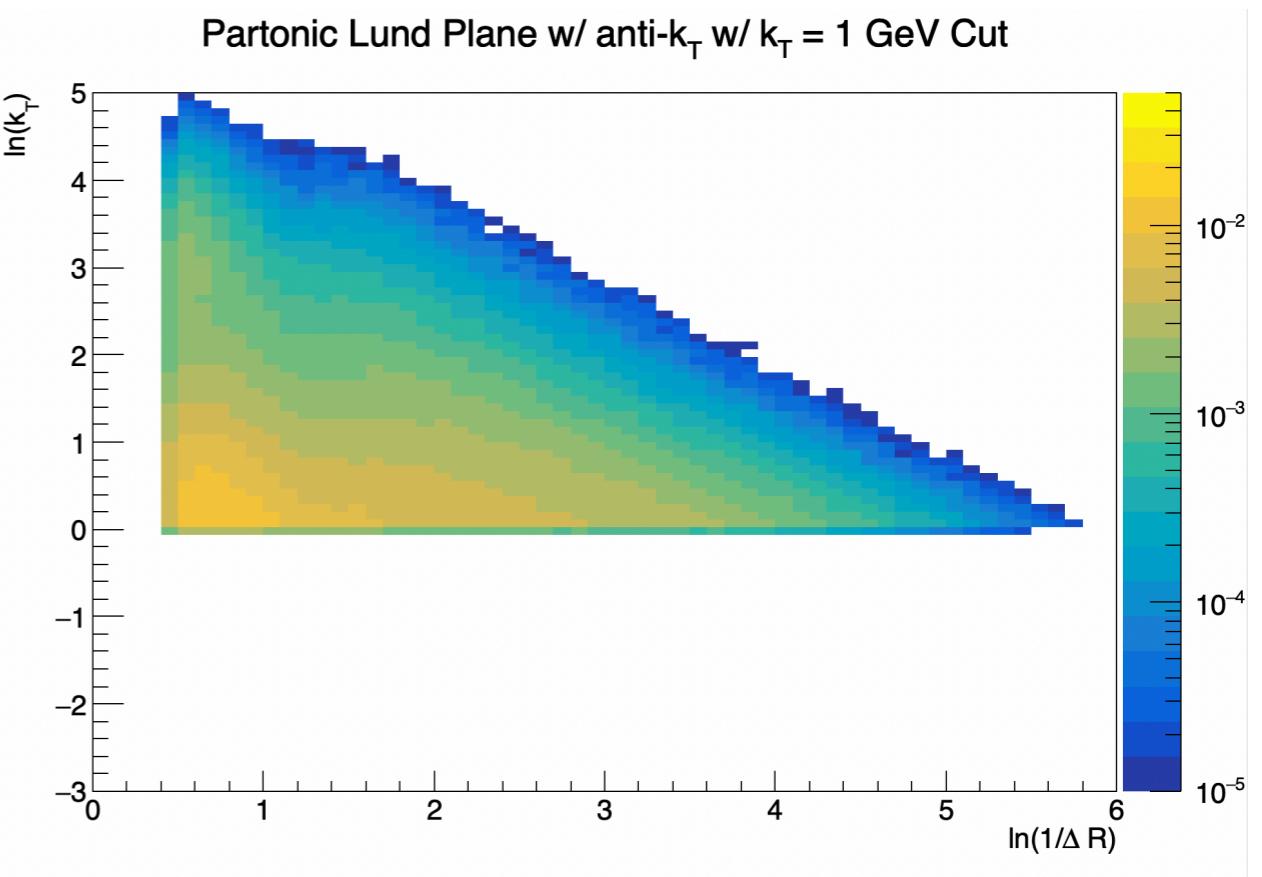

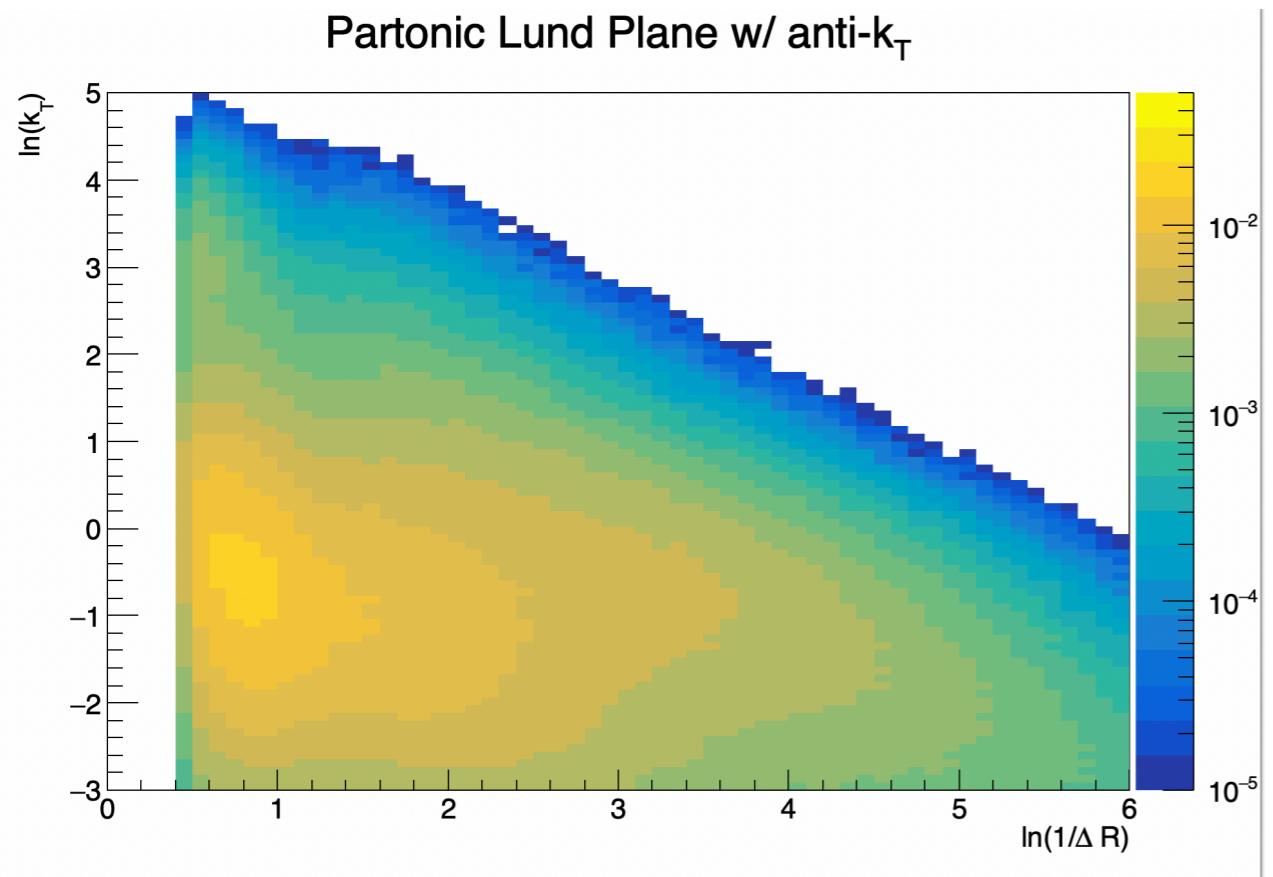

Hadronic Lund Plane w/ anti- k_T w/ $k_T = 1$ GeV Cut

JEWEL+PYTHIA
pp 5 TeV
Jet pT > 70 GeV
anti- k_T R=0.8 Jets

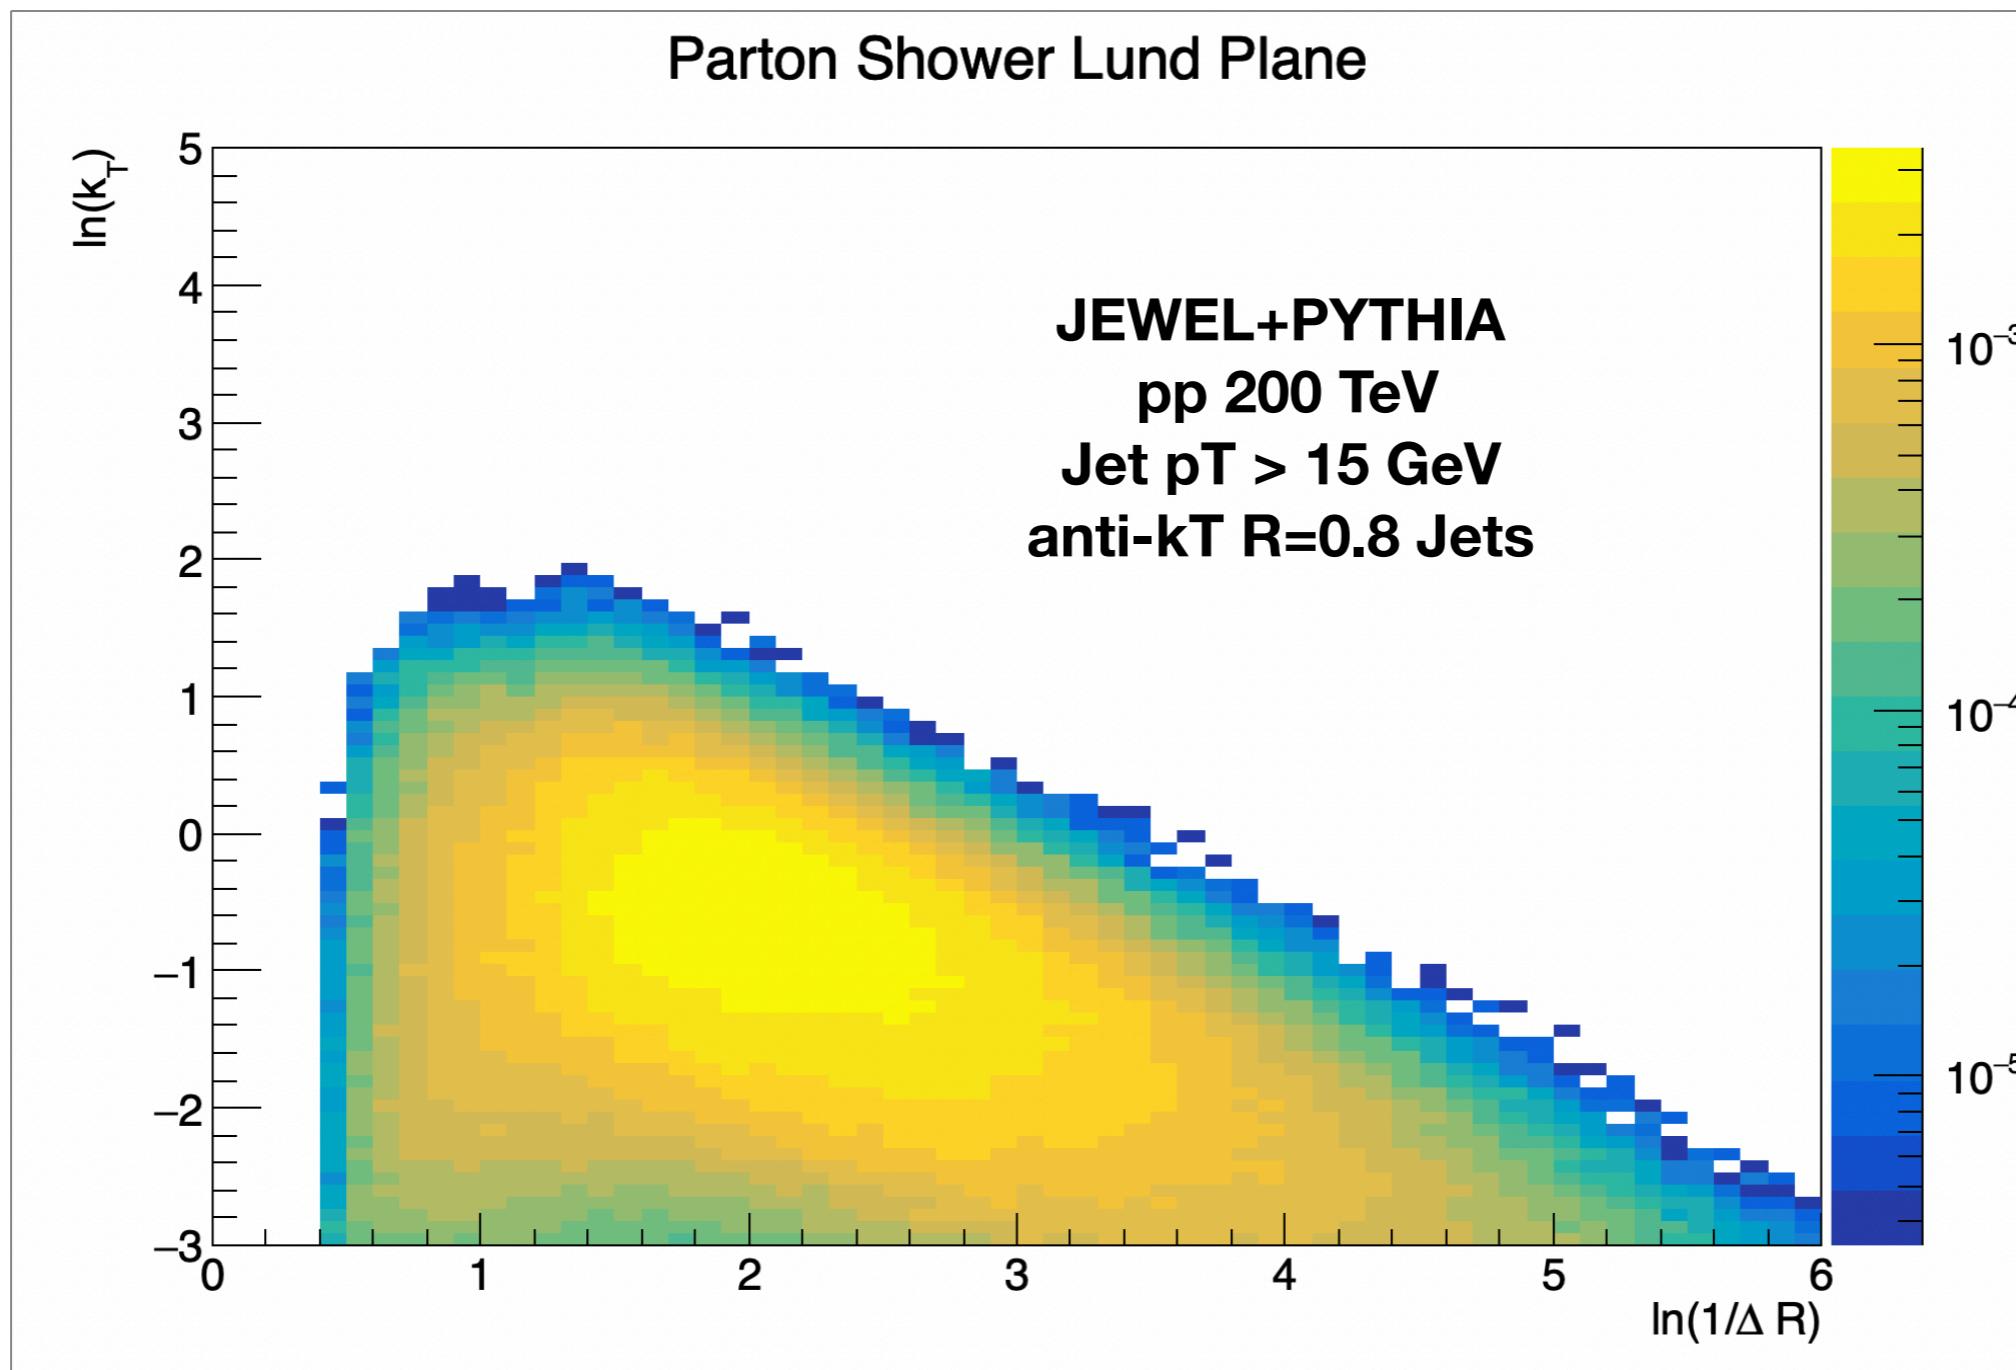

pp Collisions

Partonic Lund Planes w/ akT

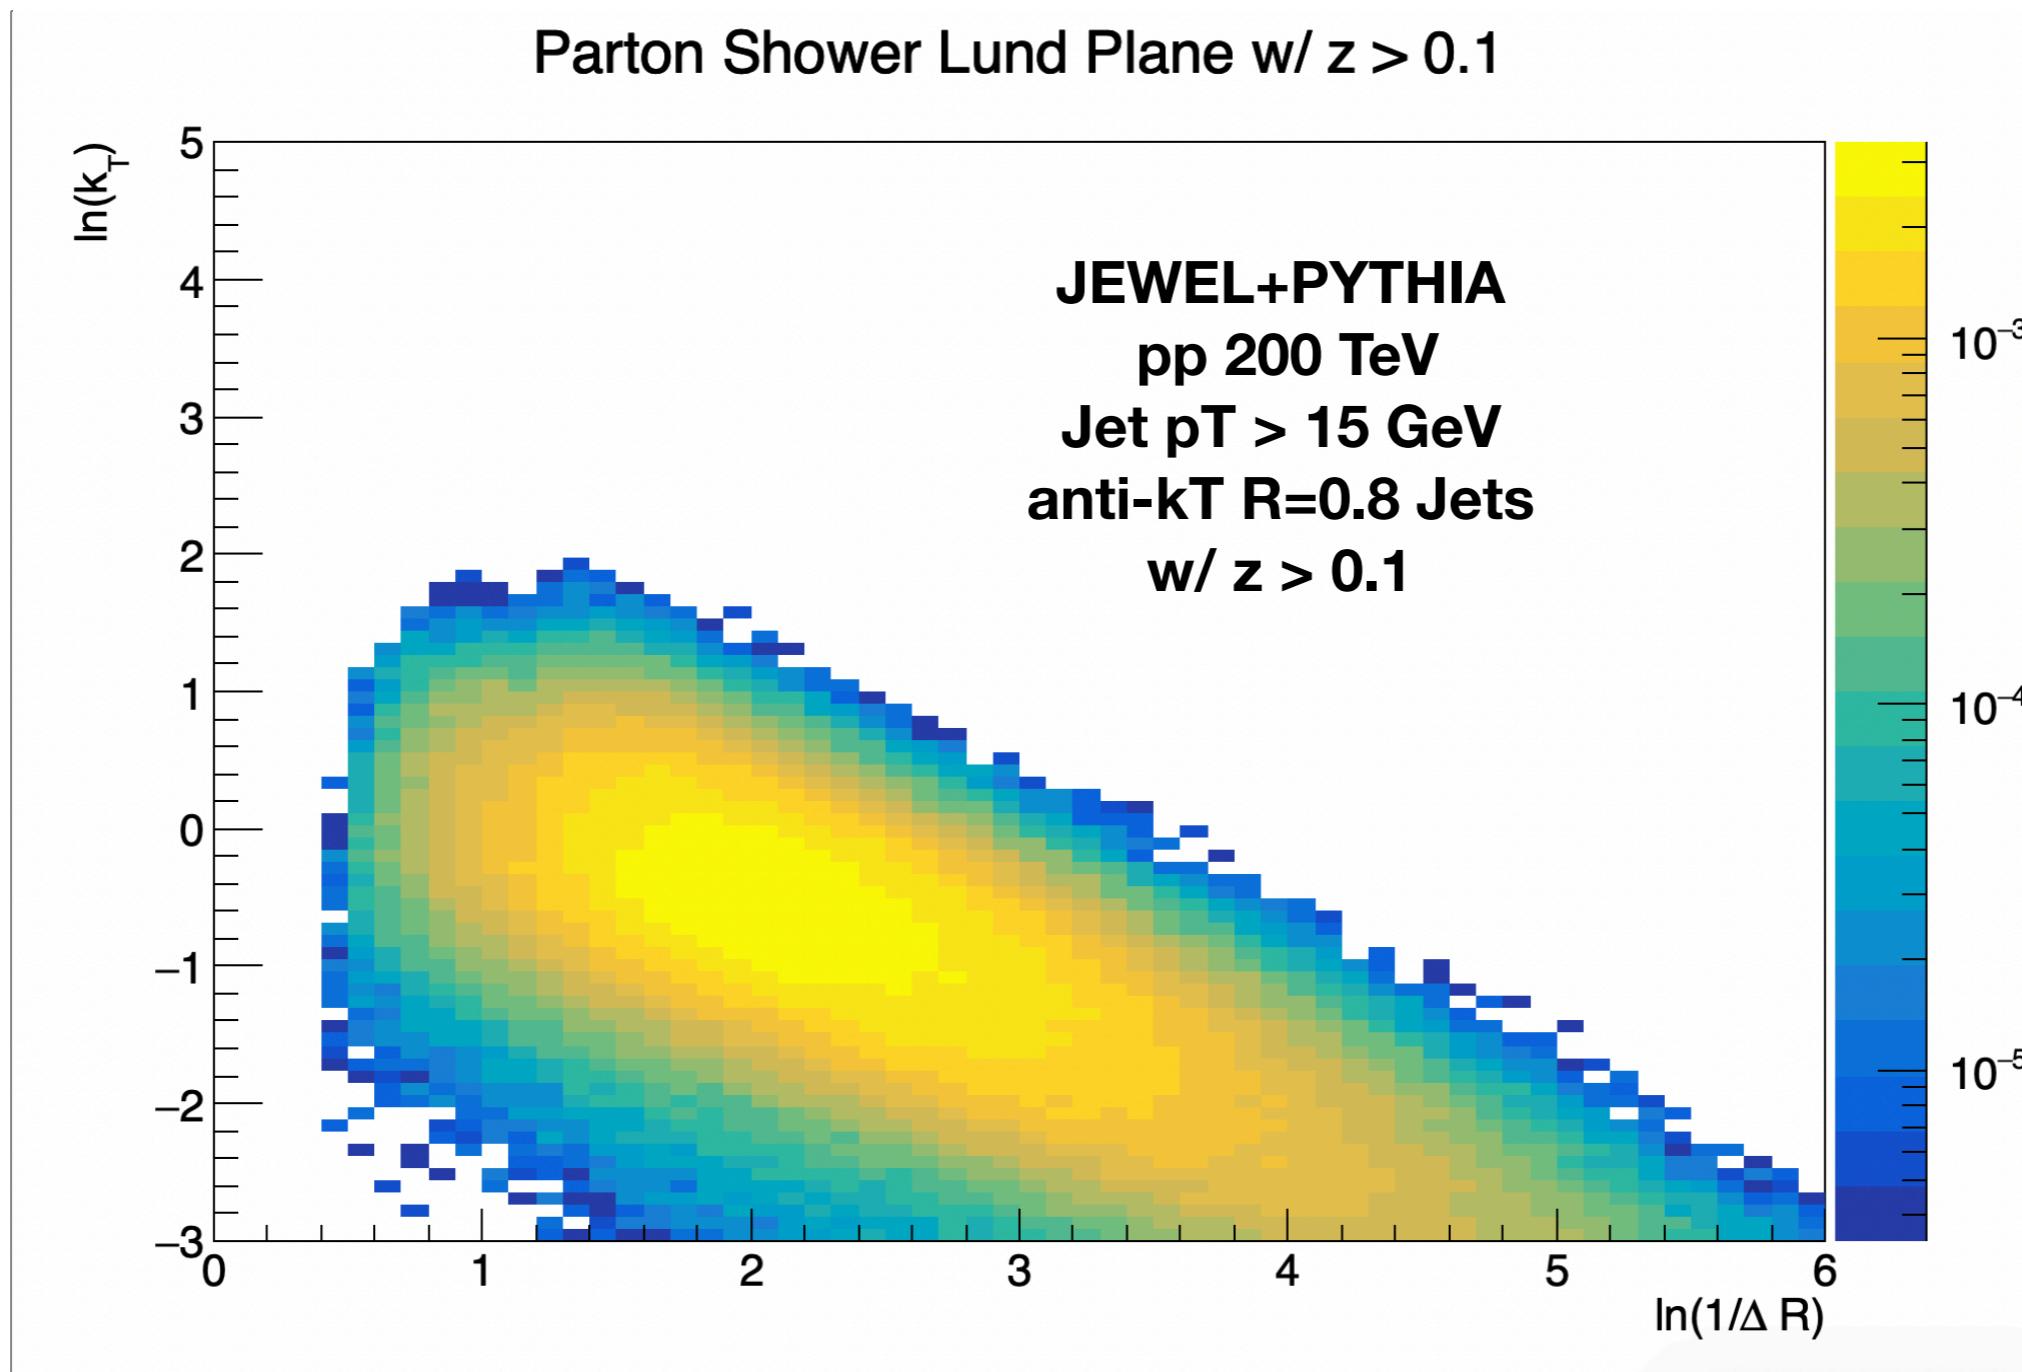

JEWEL+PYTHIA
pp 5 TeV
Jet pT > 70 GeV
anti- k_T R=0.8 Jets

pp @ 200 GeV

pp @ 200 GeV

Hadronic Lund Plane w/ k_T w/ $k_T = 1$ GeV Cut
